BOTANIC SMOOTHING

NEBEAU

Your trusted professional partner

100% Vegan:
V-LABEL European certification

- Cruelty free.
- With no animal compounds.
- Biological ingredients.

Long Lasting

- Lasts 4- 6 months.
- Compatible with all hair types, including dyed, bleached and previously straightened hair.

Botanical Ingredients

- Totally formaldehyde FREE and does not release any toxic gases.
- Can be used during pregnancy and breastfeeding.

Active Ingredients

Aloe Vera

Onlys is a waterless formula. All non-essential ingredients like water were replaced with a 41% concentration of Aloe Vera. Aloe Vera is similar to keratin, but not from animal origin.

- Re-generates the hair.
- Provide moisture and shine.
- Contains vitamins, proteins, enzymes and amino acids required for strong hair.

Ginseng

Known as the most widely used herbal remedy in the world.

- Prevents hair breakage.
- Strengthens weak hair.
- Rich in vitamins and minerals that restore the hair fiber and improves protein.re-generation.

Citric Acid

Obtained from fruit extracts such as kiwi, lemon and orange.

It is known as an astringent and anti-oxidant.

- Cleanses the hair, removing dirt and product build-up.
- Anti-oxidizing.
- Regulates pH.
- Acts as a thermal protector.

Application for Onlys smoothing

Step 1

Wet Hair

- Wet hair 50%- 60% with spray bottle or at basin.
- Water is the conductor so hair cannot be dry, but should not be dripping.
- Don't wash unless heavy build-up of styling products is on the hair, natural oils protect the scalp.
- Roots of curly hair dry quicker, so have spray bottle ready to wet hair throughout the process.

Step 2

Divide Hair

- Shake Bottle. Use average of 30-50ml per application. Divide hair into 3-4 parts.
- Take horizontal straight strands of about 2 fingers thick.
- Apply product from roots to ends.
- Work with hands until product changes colour from deep blue to lilac.
- The product will also clean the hair.
- Allow the product to work naturally and open the cuticle without immediately starting to comb.
- Only comb through at the end of the application process.

Step 3

Process

- Pile hair on top of head and wrap in plastic. Do not twist, only bend upwards.
- Do not use heat. Do not use Climazone.
- Process for 30-60 min depending on curl pattern.

Step 4

Rinse & Dry

- Rinse thoroughly with lukewarm to hot water. If not rinsed properly the product will cause fumes during drying, and drying will take longer.
- Dry with hairdryer without brush until 70%- 80% dry.
- Dry hair 100% with a round or paddle brush thereafter.
- If smoke is released it is NOT toxic or unpleasant. This will just happen if the hair was not properly rinsed or with very porous hair that absorbed excess product.

Step 5

Straightening

- Divide hair in 3-4 sections.
- Partings 1cm thick.
- Use a heat resistant comb.
- First test straightener at 200' on clients hair. If client's hair is strong enough, temperature may be increased to 230'.
- Start at roots until no smoke is released, then straighten lengths and ends until hair becomes static. Roots are thicker than ends. Move faster at ends.

Step 6

Washing

Client **MUST** wash hair within 24 hours.
Until washing, hair must not be tied, pinned, or twisted.
As premium service you can wash client immediately in salon.
Wash, Condition for 5 minutes. Dry with hairdryer.
